

WE REVOLUTIONISE THE PROFESSIONAL KITCHEN
GENERAL CATALOGUE

REVOLUTIONISING THE KITCHEN OF THE FUTURE

At QualityFry we contribute to the advancement of the professional kitchen through the design and manufacture of **automatic frying technology that with no fume and no odour**. Through our experience as an innovative company, we offer quality frying that is safe, healthy and sustainable.

COMMITMENT TO QUALITY

Our commitment to quality has led us to obtain certifications and awards that recognise us as a company of innovation, research and development.

INNOVATION IS OUR DNA

At QualityFry we believe in efficient professional cooking through innovation. That is why our designs have made us pioneers in energy savings and operator safety through the Built In fume extraction system.

GUARANTEED QUALITY

Our innovative, closed, vertical frying module fries with no light and with virtually no oxygen. In this way, we minimise heat loss and ensure a constant oil temperature during frying, guaranteeing exceptional quality.

PERSONALISED SERVICE

Our aim is focused on the real needs of our customers: to provide them with the best cooking solutions and support them through exceptional expertise and our extensive network of distributors and service partners around the world.

ECOFRY SYSTEM

Our EcoFry System, based on constant innovation and development, minimises the ecological footprint and improves energy efficiency.

ALWAYS BY YOUR SIDE

Wherever you are

We are a global company. We have our headquarters and production centre in Spain. In addition, we have a wide network of distributors and technical service in all continents.

ECOFRY TECHNOLOGY

A new fryer concept like no other on the market.
Energy efficient.

A CLOSED
MACHINE THAT
FRIES VERTICALLY

FRYING PROCESS
THAT DRIES AND
EVAPORATES THE OIL

NO SMOKE
AND NO ODOUR
TECHNOLOGY

VERSATILITY IN THE PREPARATION OF DIFFERENT FOODS

Cooks any type of product at its optimum
point, whether frozen or fresh,
sweet or savoury.

1

FRYING

Sealed frying chamber, which
does not mix flavours or odours
and also achieves faster
temperature recovery.

2

DRYING

A process that
minimises oil waste,
resulting in healthier
products.

3

EXTRACTION

Automatic product management

A TECHNOLOGY
THAT MAKES US
UNIQUE

-24%
ENERGY
CONSUMPTION

Its innovative closed and vertical frying
module minimises heat loss, keeping
the oil at an optimal temperature and
speeding up frying time, providing energy
savings over a conventional fryer.

-37%
OIL
CONSUMPTION

Its filter system creates a frying and drying process
that extracts water, volatising the solid particles of the
cooked food. Lower oil consumption doesn't just affect
oil savings, but it also has a great impact on the amount
of fats absorbed by the product, leading to frying that is
healthier and better quality.

-27%
FRY
TIME

Its filter system helps minimise frying
time thanks to its high-efficiency
technology.

FES CARROUSEL

Safety

The Fire Extinguishing System (FES) is a pre-engineering system that is designed and built under the “UNE 23510:2017 Fire extinguishing systems in commercial kitchens. Design and test requirements” standard.

TIME TO EXTINGUISH FIRE

After pressing the safety
button

1s

TOTAL DISCHARGE TIME

28s

REFERENCE STANDARDS

The FES has been subject to testing under the following reference standards:
CTE - Código Técnico de la Edificación (Spanish Technical Building Code). UNE 23510 2017 Fire extinguishing systems in commercial kitchens - Design and test requirements. EN 15351 2015. EN 16282 7 Equipment for commercial kitchens - Part 7: Installation and use of fixed fire suppression systems.

FIRE EXTINGUISHING SYSTEM (FES)

There is no need to include other external temperature control equipment or systems.
There is no need to include any other extinction systems other than those that are compulsory for your business or space.

ADVANTAGES OF THE SYSTEM

- Its active compounds are water 100% biodegradable additives that are toxic-free and environmentally friendly.
- In addition to being the optimal system for extinguishing class F fires, it is also fully certified for class A and B fires, meaning that it can be used instead of powder extinguishers in most cases.
- Once unloaded, the product doesn't deteriorate any equipment that it comes into contact with.
- As it doesn't use powder, it doesn't lead to low visibility in closed spaces.
- Unlike CO2 and powder extinguishers, there's no risk of asphyxiation or difficulty breathing when used in a closed space.

SOLUTIONS ADAPTED TO EACH SECTOR

NO SMOKE AND NO ODOUR PROFESSIONAL FRYERS

Easily customisable to your space, production or autonomy.

HORECA

QualityFry is much more than a professional fryer for the foodservice industry. It is an automatic and smart machine that marks a before and after in the professional kitchen of any restaurant, cafeteria or bar. And it does so for many reasons.

RETAIL

The world of retail welcomes QualityFry. A unique professional fryer which, thanks to its exclusive built-in technology, fries food vertically without releasing any fumes or odours. And without polluting the environment.

HOTELS

The world of hotel foodservice needs to make its business profitable now more than ever and QualityFry is the perfect solution to do so. Thanks to its automatic and smart system, this professional fryer does not require additional or specialised staff and offers endless possibilities, both in the urban and resort hotel sector.

CATERING BUSINESS

QualityFry is always the right choice when it comes to company canteens, schools, universities, museums, catering for events, etc. Above all because of its versatility. Thanks to its exclusive cooking system, this machine is capable of frying, sealing and enhancing all types of food. Whether sweet or savoury. Fresh or frozen. And it does so while improving their quality because QualityFry cooks with less fat and at the same time guarantees a longer-lasting crispiness.

PETROL STATIONS

QualityFry is a professional cooking system, unique in the market, which offers enormous possibilities for making service station visits as profitable as possible. Boosting impulse purchases, increasing the average spend and facilitating the new consumption trends based on take-away.

CONVENIENCE STORES

You don't need to own a restaurant to benefit from all the advantages that QualityFry offers. Because this professional fryer offers new business opportunities, allowing you to implement a delivery or take-away service in a small space.

BAKERY COFFEE

QualityFry is much more than a professional fryer. It is a key element when implementing new kitchen services in your business, such as take-away or delivery. But QualityFry also allows you to increase your kitchen hours and cover off-peak hours without the need to hire extra or specialised staff. Because this machine is fully automatic and smart, and can be operated while serving customers.

OTHER SPACES

Cinemas, theatres, stadiums, theme parks, food trucks, cruise ships... Wherever there's leisure, free time and fun, there's a place for QualityFry. Because this professional fryer is, among other things, small and handy. And because it is single-phase, it is very easy to install. But its advantages go far beyond that.

WHAT CAN IT COOK?

Thanks to QualityFry's advanced technology, we achieve the perfect finish and flavour when frying all kinds of food products, whether fresh or frozen, sweet or savoury, all using the same oil and without mixing aromas or flavours. With QualityFry, the end product is food products that are visibly more attractive, golden and crunchy. A quality that only our products can offer.
